Figure 1 consists of 12 bar charts, each representing a different birth cohort. The x-axis for all charts is 'Number of children' (0 to 10), and the y-axis is 'Percentage of women' (0 to 100). The cohorts are: 1940-44, 1945-49, 1950-54, 1955-59, 1960-64, 1965-69, 1970-74, 1975-79, 1980-84, 1985-89, 1990-94, and 1995-99. The charts show a clear trend of decreasing fertility over time, with the peak number of children per woman shifting from 4 in the 1940s to 2 in the 1990s.

Figure 1 consists of 12 bar charts, each representing a different life event. The x-axis for each chart shows age groups: 18-24, 25-34, 35-44, 45-54, 55-64, 65-74, and 75+. The y-axis represents the percentage of respondents, ranging from 0% to 100%.

- 1. Death of a family member:** Shows a general upward trend with age, peaking in the 75+ group.
- 2. Divorce:** Shows a significant peak in the 25-34 age group, with a sharp decline in older groups.
- 3. Marriage:** Shows a peak in the 25-34 age group, with a decline in older groups.
- 4. Moving home:** Shows a peak in the 25-34 age group, with a decline in older groups.
- 5. Change of job:** Shows a peak in the 25-34 age group, with a decline in older groups.
- 6. Change of school:** Shows a peak in the 18-24 age group, with a decline in older groups.
- 7. Change of religion:** Shows a peak in the 18-24 age group, with a decline in older groups.
- 8. Change of country:** Shows a peak in the 18-24 age group, with a decline in older groups.
- 9. Change of city:** Shows a peak in the 18-24 age group, with a decline in older groups.
- 10. Change of house:** Shows a peak in the 18-24 age group, with a decline in older groups.
